

Pure Perfection aftercare advice

We are passionate about sharing our knowledge so you can receive the best out of your treatment.

The perfect nail treatment

You will absolutely LOVE your nails and I expect your nail enhancements will last up to three weeks as long as you give them good care and attention during that time and always discuss your desired look and nail goals.

Treat your nails like jewels not tools.

Try to adapt to using the sides of your hands and fingers to open car doors, washing machines etc.

Use cuticle oil at least twice a day to keep your nail extensions flexible.

Use acetone free nail polish remover when taking off polish from your enhancements.

Let us remove them correctly if you wish them be removed because we care about your nails.

Do not pick or remove enhancements with your teeth or any other object as this may cause distress and weaken your natural nails.

Do not pick at the natural nail underneath your enhancements, as this will weaken the artificial nail.

Please do not use super glue to do a DIY repair as you could be doing more damage than you realise.

It is recommended that you book appointments every 2 - 3 weeks to keep your enhancements from becoming too long or top heavy.

Discuss with your therapist what your nail goal is, so we can help you get there.

Always inform your therapist in the event of any reaction so we can update our record details.

We will look forward to seeing you on your next visit

Kind regards PP team
